keyless cabinet lock with master key suitable for swimming pool/gym PY-TM106-Y

Technical parameters :

battery life: Above 18000 times in normal
Scanning time <0.1S
Working Voltage DC6V(4 pieces of 5# alkaline batteries)
Temperature Range (using) -40~+85°C
Card Distance 30 mm
lower-voltage directives 4.8V
operating humidity RH (15 ~ 85)%
Quiescent current: < 12 uA
Dynamic current <150 MA
Card Type TM

Performance characteristics:

1. Friendly interface, easy handling
2. Integrated design, easy installation
3. Elegant, security and durable
4. Trong electrical interference
5. Work steadily
6. unlock way: TM CARD
7. Low voltage alarm function.
8. Convenient, simple.

Advantages of our electrical Cabinet/ sauna door locker lock:

1, Zinc Alloy, as an organic whole construction, can plate out all sorts of colors, beautiful, solid, durable in use.
2,Full-automatic switch-box, without rotating handle, convenient, simple.
3, The strong electrical interference and it can work steadily.
4, Can use battery to supply power, with a low voltage alarm function
