

IP43 waterproof RFID single door access control with keypad PY-668B

Description:

This product is RFID access control system, which is currently one of the advanced access systems. It uses the latest central process unit (CPU) and memory chip of large capacity. There will be of no information loss even in case of power failure. It takes the latest HOMMARD technology, with strong power of three ways to open door: open by card read, open by card read adding with password, and open by password.

The perfect security functions let the users feel much more safe, which include door state monitoring, alarm output, safety mode, anti dismantling, RFID card and password. While its functions of opening button, close notification, door bell, to be connected with NO. and NC. locks bring more operating easiness to the users.

Technical Features:

No	Item	Specification
1	Power supply	DC: Voltage 12V current <0.1A
2	Max load	Alarm output: 100mA Electrolock output: 3A
4	Weight	180g
5	Ambient temp.	-20 60
6	RH	20%—90%
7	Memory capacity	Information of 2000 user card, and 2000 passwords,Ten Password in common use
8	Universal Password	10 sets of universal password
9	Induction distance	8-13CM
10	Card type	EM or EM compatible card

Application: business organizations, offices, factories, residences and communities
